Microbiology and Infectious Diseases

VDRL (RPR), SERUM

Sample No : 0700271327 Collection Date : 22/04/22 10:53 Ack Date : 22/04/2022 11:37 Report Date : 22/04/22 18:58

VDRL (RPR), SERUM

VDRL (RPR), SERUM Non Reactive

Sample - Blood

This is a screening test for syphilis which is useful for following the progression of disease and response to therapy. Rising titres are helpful in confirming the diagnosis.

Biological false positive reactions are not uncommon and have been attributed to a variety of acute and chronic conditions. It is advisable to confirm the diagnosis by tests

such as TPHA and FTA-ABS. It is strongly recommended that results of the test should be correlated with clinical findings to arrive at the final diagnosis.

End of Report

Dr. Harsh Prason , MD
